EDUCATION

Northeastern University, Boston, MA **Sept. 2021 - Aug. 2025**
Khoury College of Computer Sciences
Bachelor of Science in Computer Science, Concentration in Artificial Intelligence
Relevant Courses: Artificial Intelligence · Natural Language Processing · Machine Learning & Data Mining · Algorithms & Data · Object-Oriented Design · Software Engineering Fundamentals · Foundations of Data Science

TECHNICAL KNOWLEDGE

Languages: Python · Java · JavaScript · TypeScript · SQL · HTML · CSS
IDEs: VS Code · IntelliJ · PyCharm · Eclipse
Tools: Git · Postman · Vitest · Linux/Unix CLI · Power Automate · Microsoft Excel · Azure DevOps
Frameworks: React · Node.js · Flask · SQLAlchemy · PyTorch · Zod

PROJECTS

Strategy.town **June 2025**
- Designed and integrated REST APIs with Node.js backend to manage game state, user data, and statistics
- Built interactive frontend features with React (TypeScript), including profile privacy and dynamic UI updates
- Tested logic and APIs using Vitest and Postman, improving reliability and meeting defined user stories

AI Hoops! **April 2024**
- Engineered a DDQN-based reinforcement learning system in PyTorch for an Atari basketball simulation
- Optimized model performance using RAM inputs (128 features) instead of image data
- Applied experience replay and epsilon-greedy strategies to improve convergence

EXPERIENCE

Secure & Precise Logistics | Amazon Delivery Service Partner, Middlesex, NJ **Jan. 2026 - Present**
Web Developer & IT Coordinator
- Launched and maintain the company's hiring site (secureandpreciselogistics.com) in React (TypeScript), Vite, and Tailwind, with online job applications
- Developed an interview-scheduling flow that saves bookings to a database and sends email alerts
- Troubleshot company smartphones and driver applications to support daily delivery operations across two stations

Northeastern University, Boston, MA **July 2024 - Aug. 2024**
Teaching Assistant (Intermediate Programming with Data)
- Led weekly lab sessions for 30+ students, reinforcing Python and problem-solving skills
- Supported students during daily office hours with debugging and course concepts
- Evaluated assignments, managed grading, and coordinated course logistics

Harvard University, John F. Kennedy School of Government, Cambridge, MA **July 2023 - Dec. 2023**
IT Analyst & Software Developer
- Automated ServiceNow ticket workflows using Power Automate, improving efficiency and resolution time
- Created a centralized onboarding dashboard using Flask and SQL, reducing manual IT workload
- Cleaned and structured training data for an internal chatbot to increase accessibility of onboarding resources
- Resolved 488 technical issues across hardware, applications, and operating systems

NYC Gov. Department of Citywide Administrative Services (DCAS), New York, NY **July 2022 - Aug. 2022**
Summer College IT Intern
- Performed manual testing and test validation for the NYC Civil Service Exam portal using Excel test scripts
- Mapped business requirements and workflows through process flowcharts
- Participated in Agile meetings using Azure DevOps to track requirements and project updates

Girls Who Code, Johnson & Johnson, Raritan, NJ **July 2019 - Aug. 2019**
Member (Software & Robotics Projects)
- Programmed an Arduino maze-solving robot in C++ and built a travel web application using JavaScript, Java, Node.js, and external APIs

VOLUNTEER EXPERIENCE

Darul Arqam Soup Kitchen, South River, NJ **Aug. 2018 - Present**
Volunteer weekly, serving 30+ community members through a local mosque's soup kitchen
