EDUCATION

Northeastern University, Boston, MA

Sept. 2021- Aug. 2025

Khoury College of Computer Sciences

Bachelor of Science in Computer Science, Concentration in Artificial Intelligence

Relevant Courses: Artificial Intelligence · Natural Language Processing · Machine Learning & Data Mining · Algorithms & Data · Object-Oriented Design · Software Engineering Fundamentals · Foundations of Data Science

TECHNICAL KNOWLEDGE

Languages: Python · Java · JavaScript · TypeScript · SQL

IDEs: VS Code · IntelliJ · PyCharm · Eclipse · Linux/Unix CLI

Tools: Git · Postman · Vitest · REST APIs · JSON · Power Automate · Microsoft Excel · Azure DevOps

Frameworks: React · Node.js · Flask · SQLAlchemy · PyTorch · Zod

PROJECTS

Strategy.town

June 2025

- Designed and integrated REST APIs with Node.js backend to manage game state, user data, and statistics
- Built interactive frontend features with React (TypeScript), including profile privacy and dynamic UI updates
- Tested logic and APIs using Vitest and Postman, improving reliability and meeting defined user stories

AI Hoops!

April 2024

- Engineered a DDQN-based reinforcement learning system in PyTorch for an Atari basketball simulation
- Optimized model performance using RAM inputs (128 features) instead of image data
- Applied experience replay and epsilon-greedy strategies to improve convergence

EXPERIENCE

Northeastern University, Boston, MA

July 2024 - Aug. 2024

Teaching Assistant (Intermediate Programming with Data)

- Led weekly lab sessions for 30+ students, reinforcing Python and problem-solving skills
- Supported students in office hours with debugging and course concepts
- Evaluated assignments, managed grading, and course coordination

Harvard University, John F. Kennedy School of Government, Cambridge, MA

July 2023 - Dec. 2023

IT Analyst & Software Developer

- Automated ServiceNow ticket workflows using Power Automate, improving efficiency and resolution time
- Developed a centralized onboarding dashboard using Flask and SQL, reducing manual IT workload
- Cleaned and structured training data for an internal chatbot, improving accessibility of onboarding resources
- Resolved 488 technical issues across hardware, applications, and operating systems

NYC Gov. Department of City Administrative Services (DCAS), New York, NY

July 2022 - Aug. 2022

Summer College IT Intern

- Performed manual testing and test validation for the NYC Civil Service Exam portal using Excel test scripts
- Mapped business requirements and workflows through process flowcharts
- Participated in Agile meetings using Azure DevOps to track requirements and project updates

Girls Who Code, Johnson & Johnson, Raritan, NJ

July 2019 - Aug. 2019

Member (Software & Robotics Projects)

- Programmed a maze-solving robot using Arduino and C++, integrating sensors for navigation
- Implemented a travel web app with HTML, JavaScript, Java, and Node.js, integrating external APIs

VOLUNTEER EXPERIENCE

Darul Arqam Soup Kitchen, South River, NJ

Aug. 2018 - Present

Volunteer

- Volunteered 7 hours weekly at a soup kitchen facilitated by the local mosque, serving 30+ community members
